Tony Stark
Senior Technical Recruiter
Google
1600 Amphitheatre Parkway
Mountain View, CA 94043

Dear Mr.Stark,

With a Bachelor's Degree in Computer Science, numerous years of hands-on experience creating and implementing software applications, and the ability to rapidly design and develop service-oriented software systems in a timely and innovative manner, I confidently express my interest in your posting on Google Careers for a New Grad Software Engineer.

I have interned as a Software Engineer at AWS AI organization, where I developed an application to extract metric data from Correction-of-Error (COE) reports, parse and transform the data, use ML to detect anomalies, and visualize the result with internal tools. I was responsible for the full lifecycle development of the service, from initial requirement gathering to design, coding, testing, documentation, implementation, and the final deployment to multiple A-Z regions. In addition to the technical experience, I also gained a valuable understanding of time management and open communication. I have found that being able to express my concerns, roadblocks, and alternative solutions to managers and colleagues has been invaluable in my professional development.

Google has established and continues to nurture a culture that fosters high levels of both work satisfaction and contribution from its employees. I believe that Google is the perfect place for me to step out of my comfort zone to learn and grow both professionally and personally. Also, I have a solid education foundation, a passion for problem-solving, and an inquiring mind that will make me a successful Software Engineer at Google.

Attached is a copy of my resume that further explains my background and technical skills. I can be reached anytime via my cell phone, (206) 123 4567, or via email at shli001@uw.edu. Thank you for your time and consideration. I look forward to speaking with you more about this opportunity.

Best regards,
Shang Li
